WATER FILLED KETTLEBELL

WS4320

The water filled kettlebell use hydro-inertia to challenge your muscles and balance. Adjustable weight from 4-12 pounds, add or remove water to adjust the weight. Stored away easily, and transported easier than any kettlebell you've used before. Two handles allow for multiple grip options and expanded workouts when compared to traditional kettlebells. Won't damage floors when dropped.

- Material: PVC
- Weight: 4-12LB

SOFT KETTLEBELL

WS4310

This soft kettlebell is covered in a soft neoprene fabric with a soft grip handle and filled with iron sand making them extremely comfortable to handle. They will not damage your floor or equipment if dropped so they are ideal for outdoor or indoor use.

- Material: Neoprene, Sand, Foam
- Weight: 1-5KG

POWER BELL

WS4311

The power bell is a powerful and effective exercise tool that will sculpt and tone your entire body. Combines functional strength training and high calorie burning. Soft neoprene shell for added comfort and surface protection. Durable soft foam handles for a more comfortable grip. Iron sand filled weights.

- Material: Neoprene, Iron sand
- Weight: 6-10LB, 2-10KG

OB-86 OLYMPIC CERAKOTE BAR

The bar shaft is made from precision ground alloy steel. The special Cerakote—coating is a very thin-slightly transparent looking, matte ceramic coating, which can feel the direct contact with the pure steel and provides a secure grip. The coating has excellent resistance to corrosion and has low abrasion properties.
